

Scan for 5G Signals.

WilsonPro's Cellular Network Scanner 5G provides detailed data for an unparalleled range of cell signals.

Use the Cellular Network Scanner 5G to accelerate design time, reduce on site visits, demonstrate ROI to clients, and more.

CELLULAR NETWORK SCANNER
SKU: 910060 MSRP: \$1,299.99

Available for download:

App Store

Google Play

- Scans for 5G and 4G signals, including C-Band, and CBRS
- Identifies all carrier networks
- Pinpoints cell tower location and ID
- Syncs with CellLinQ by WilsonPro app on iOS and Android

Signal Detail

Select any tower to display signal quality, carrier, band, DL frequency, and more.

Comprehensive Scans

Identify unique 5G signals such as C-Band, and CBRS frequencies.

Project Management

Customize, organize, and save all of your installs to the cloud for safekeeping.

Project Export

Easily export your system design projects as .csv files for use in Excel.
